Personal Statement

I am a M.Sc. Economics (Data Analytics) student with a strong foundation in economic theory and data analysis. Leveraging proficiency in Python, R, SQL, and Stata, I specialise in quantitative research, econometric modelling, and transforming complex datasets into actionable insights. My academic background includes hands-on projects in cross-country econometric modelling and comparative macroeconomic Phillips Curve analysis. I am eager to apply my analytical rigour, research tools, business analysis, and statistical expertise while continuing to learn and contribute to organisational growth.

Education

2025-2027	Expected (2027)
M.SC ECONOMICS (Data Analytics)	FY GPA : 8.14
<i>Symbiosis School Of Economics, Pune</i>	
2022-2025	
B.SC ECONOMICS HONS	CGPA : 7.061
<i>The Bhawanipur Education Society College, University Of Calcutta</i>	

Academic Projects

Inflation–Unemployment Dynamics During the 2008 Global Financial Crisis: A Comparative Phillips Curve Analysis (US vs Germany): Conducted a comparative macroeconomic analysis to examine the Phillips Curve relationship during the 2008 financial crisis using quarterly data (2005–2011). Findings indicated a weak and statistically insignificant relationship between inflation and unemployment, suggesting a flattening of the Phillips Curve during the crisis.

Assessing the Link Between Democratic Destabilisation and Militarisation: Performed a cross-country econometric analysis examining how military expenditure, military personnel, poverty gap, and autocratic status influence the Democratic Index. Using data from the World Bank and OECD, a multiple regression model explained 58% of variation in democratic stability ($R^2 = 0.58$). Diagnostic tests (VIF and Breusch–Pagan) confirmed model reliability.

Certifications

- Introduction to Python Programming, University of Pennsylvania (Coursera)
 - Introduction to Data Science in Python, University of Michigan (Coursera)
 - Databases and SQL for Data Science with Python, IBM (Coursera)
 - Generative AI: Introduction and Application, IBM (Coursera)
-

Skills

- Microsoft Office: Advanced Excel, PowerPoint, Word
 - Analytical Tools: Python, SQL, R programming, Stata, SPSS, Power BI
 - Financial & Business Analysis: Financial Modelling & Valuation (FMVA), SWOT Analysis & Industry Research
 - Research: Data Gathering and Analysis, Time Series Forecasting, Reporting and Documentation, Academic Research Projects
 - Languages: English, Hindi (Working Proficiency), Bengali (Native)
-

Extra-Curricular Activities & Hobbies

- Participated & Won in Regional-Level Singing and Dance Competitions (Inter-School Level)
- Participated in a College-Level Audio-Play Competition (Intra-College)
- Passionate about analysing public socio-economic datasets and building dynamic dashboards using Python, R, and Power BI.
